PROFESSIONAL SUMMARY

Senior Flutter Developer with 4+ years of comprehensive experience in building scalable, high-performance cross-platform mobile applications. Specialized in creating complex solutions for Fintech, EV Charging, Streaming, HRMS, and Real-time communication domains. Proficient in Dart, Flutter, Firebase, REST APIs, and modern state management (Riverpod/BLoC). Demonstrated track record of delivering 25+ production-grade applications to Play Store and App Store.

TECHNICAL SKILLS

- **Languages:** Dart, Java (Android), Python, HTML, CSS, SQL.
- **Frameworks:** Flutter, Flask (Python), Laravel (Basic).
- **State Management:** Riverpod, Provider, BLoC, GetX.
- **Architecture:** Clean Architecture, MVVM, Repository Pattern, SOLID Principles.
- **Cloud Backend:** Firebase (Auth, Firestore, Cloud Functions, Messaging), Google Cloud Platform.
- **Networking APIs:** RESTful APIs, GraphQL, Dio, Retrofit, WebSockets.
- **Tools DevOps:** Git, GitHub Actions, Codemagic, Docker, Postman, Jira, Figma.
- **Mobile Capabilities:** Google Maps SDK, Geolocation, Biometric Auth, In-App Purchases, Deep Linking, Push Notifications, Offline Sync (Hive, Drift).
- **Integrations:** Stripe, Razorpay, Telnyx Twilio (WebRTC), ZegoCloud (Streaming).

PROFESSIONAL EXPERIENCE

Flutter Developer

Sanshray IT Solutions LLP

Jan 2025 – Present

Remote / Hybrid

- Spearheading the development of high-performance mobile applications focusing on educational and communication sectors.
- Architecting scalable solutions and ensuring code quality through rigorous review processes.
- Overseeing the full mobile development lifecycle from concept to deployment.

Flutter Developer

Kody Technolab LTD

Dec 2021 – Jan 2025

Ahmedabad, India

- Played a key role in the mobile development team, contributing to over 15 production apps.
- Technically lead the development of 'MOM Digital' and 'TakeProfit' products.
- Mentored junior developers, introduced effective state management patterns (Riverpod), and improved CI/CD pipelines.
- Collaborated with cross-functional teams to integrate IoT solutions for robotics projects.

PROJECTS

Karuna Care – Animal Welfare Platform

Flutter, Live Streaming, Payments

- Created a donation platform connecting users to animal shelters via live video feeds.
- *Key Features:* Live streaming, In-app wallet/coins, Shelter verification system.
- *Impact:* Facilitated transparent contributions to gaushalas and shelters across India.

Utah Avalanche Center – Safety Weather

Flutter, Google Maps

- Built a critical safety app providing real-time avalanche forecasts and weather alerts.
- *Key Features:* Interactive danger zone maps, Push notifications, Offline data access.
- *Tech:* Google Maps SDK, Location Services, REST APIs.

MOM Digital – HRMS Workforce Management

Flutter, Biometrics

- Engineered a comprehensive HR platform for attendance, payroll, and performance tracking.
- *Key Features:* Biometric check-in, Geofencing, Leave management, Document cloud sync.
- *Role:* Designed core architecture and offline-first synchronization logic.

MOM Kiosk – Touch-free Attendance

Flutter, Face Recognition

- Developed a dedicated kiosk station for employee attendance using face recognition.
- *Key Features:* Fast face matching, Offline logging, Auto-sync when online, Kiosk mode.

Mango – Social Networking Calling

Flutter, WebRTC

- Built a secure social app enabling messaging, voice, and video calls.

- *Key Features:* Group chats, Media sharing, End-to-end encryption, Status updates.
- *Tech:* WebRTC (Voice/Video), WebSocket for real-time chat.

TakeProfit – Crypto Analytics Trading

Flutter, Real-time Data

- Created a subscription-based analytics tool for crypto traders with stop-loss alerts.
- *Key Features:* Real-time price tracking, Profit/Loss dashboards, Role-based access (Trader/Recommender).
- *Tech:* Complex State Management, Charting libraries, IAP.

Crimechime – Community Safety Reporting

Flutter, Maps, Heatmaps

- Developed a community-driven crime reporting application.
- *Key Features:* Dynamic crime heatmaps, Clustered map markers, Real-time incident reporting.
- *Tech:* Google Maps Platform, Marker Clustering, Location Awareness.

Country Kart – Multi-Service Marketplace

Flutter, Firebase

- Built a marketplace connecting users with local service providers (Home, Beauty, etc.).
- *Key Features:* Service booking, Real-time chat, Reviews, Transparent pricing.

Blupaws – Pet Wellness Telemedicine

Flutter, Twilio Video

- Designed a pet care platform offering vet video consultations and grooming bookings.
- *Key Features:* Live video calls (Twilio), Appointment scheduling, Service marketplace.

Medan TV – Live Media Streaming

Flutter, HLS Streaming

- Developed a live TV and on-demand video streaming platform.
- *Key Features:* Live channels, EPG schedule, offline downloads.

ScholarCafe – AI-Powered Education

Flutter, AI Integration

- Educational platform with ChatGPT, Google Translate, and AI OCR integration.
- *Key Features:* Note-taking, real-time collaboration, speech-to-text.

Dasher / Odigo – Robotics Companion

Flutter, ROS, Java

- Cross-platform app for controlling ROS-based robots (Android/iOS/Web/Desktop).
- *Key Features:* Real-time robot communication, bridge development.

Xandria – Digital Library eBook Reader

Flutter, Epub Reader

- eBook and audiobook platform with in-app purchases and crypto payments.
- *Key Features:* 3D virtual museum, book club chat, audio streaming.

Crumbss – Food Rescue Platform

Flutter, Maps

- App for reducing food waste by connecting users with surplus food vendors.
- *Key Features:* Real-time availability, Location-based discovery.

CERO – EV Charging Network

Flutter, OCLC

- EV charging management app for live station availability and analytics.
- *Key Features:* Partner dashboard, historical usage logs.

Chargesol – Dynamic EV Pricing

Flutter, Analytics

- Integrated public/private infrastructure with dynamic pricing engine.
- *Key Features:* Session analytics, multi-payment support.

Wuerth EV App – Fleet Charging

Flutter, Fleet Mgmt

- Enterprise fleet charging application with tariff tracking.
- *Key Features:* Station navigation, wallet payments, fleet dashboards.

OPEN SOURCE CONTRIBUTIONS

- **Localization Studio:** Production-ready ecosystem for automated multi-language translation (Flutter + Python).
- **Keyify:** Intelligent Dart CLI tool for auto-extracting localizable strings.
- **Flutter Face Match:** Hybrid face recognition system using TensorFlow Lite.

EDUCATION

Bachelor of Technology in Computer Engineering
Gujarat Technological University

2021
Gujarat, India

CERTIFICATIONS

- **Certificate Course in Flutter** – ILDC, IndiaNIC Infotech Ltd. (2021)
- **Responsive Web Design** – freeCodeCamp.org (2021)
- **Python for Everybody** – University of Michigan, Coursera (2020)

INTERESTS

Open Source Contribution, Tech Blogging, Traveling, Smart Home Automation, IoT Experimentation.
